

## H-Type Primary Cleaner

Product	Description
<b>H Series Tungsten</b> 	<p>The H-Series primary cleaner is suitable for vulcanised belt applications where a combination of high performance cleaning and low maintenance belt cleaning solution is required. The H-Series cleaner removes up to 80% of carry back materials left on the conveyor belt after product discharge.</p>
<b>H Series Superpole</b> 	<p>The H Series Superpole is a primary cleaner specifically designed for large belt width high speed, high tonnage conveyor systems where a robust cleaner design is paramount.</p>
<b>H Series Polyurethane</b> 	<p>An all round primary belt cleaner for applications where mechanical fasteners or excessive belt cover damage exists. All H-Series Polyurethane cleaners are supplied with a spring adjuster system for continued self adjustment between services.</p>
<b>H Series Econocleaner</b> 	<p>A variation on the H-Series Polyurethane where cost effectiveness and cleaner performance come together. The H Series Econocleaner is designed to reduce capital outlay and ongoing maintenance costs while not compromising on belt cleaner performance.</p>
<b>Skalper</b> 	<p>A sturdy primary cleaner with low initial &amp; ongoing maintenance costs. The Skalper cleaner offers self tensioning adjustment with fast blade change out for maximum on-site serviceability.</p>
<b>Tuff Stuff XHD</b> 	<p>The TuffStuff XHD primary cleaner is a polyurethane tipped belt cleaner which delivers maximum cleaning efficiency for almost any belt cleaning application. Available with both air and spring tensioning options, the TuffStuff XHD combines efficient cleaning with maximum on site serviceability.</p>
