

BULK MATERIALS HANDLING SOLUTIONS
MADE BETTER

K-Spiral Cleaning Roller

K-Spiral Cleaning Roller offers a maintenance free solution to belt cleaning. The resilient and wear resistant polyurethane spirals helps to clean off sticky carry back. The spiral is left and right hand configuration to assist in belt tracking. They are suited to the mining, quarrying and process industries, where build up on return rollers causes belt damage and miss-tracking. The unit is ideally positioned over the discharge chute or a collection hopper. They are not effected by mechanical joining fasteners.

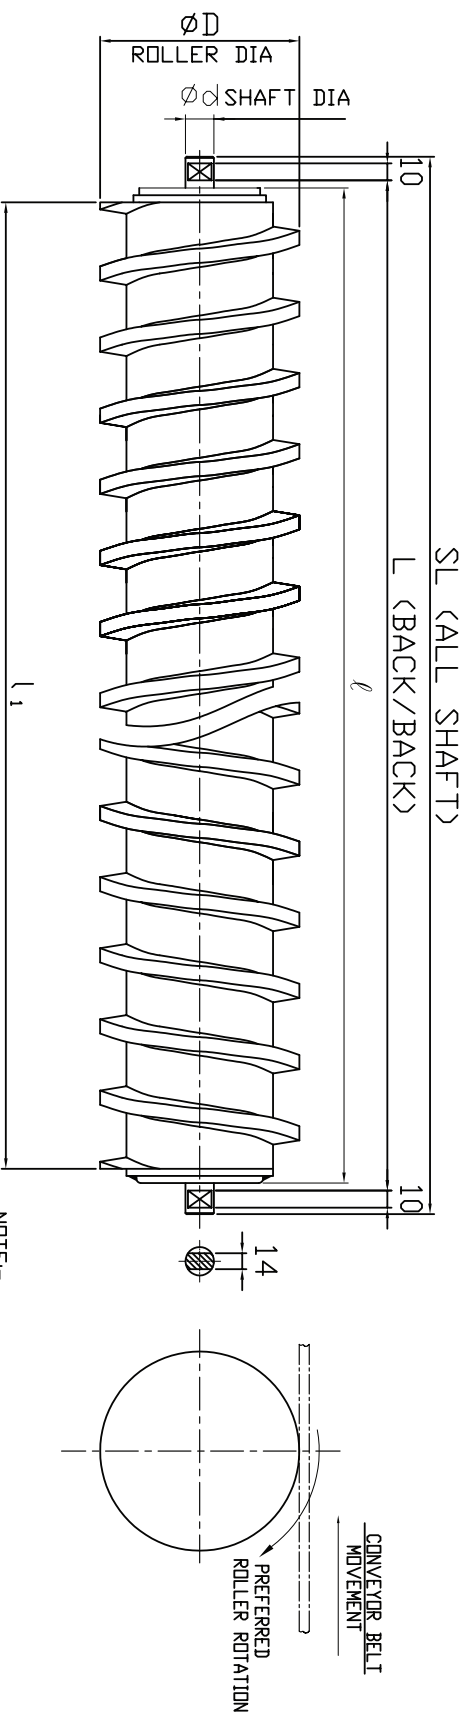

KEY BENEFITS

- Suitable for all belt widths.
- Uses standard return brackets.
- Suitable for reversing belts.
- Not effected by mechanical fasteners.
