

General Safety Information

Kinder Australia always recommends that maintenance or installation is carried out in accordance with the site OH&S Policies and procedures. Kinder Australia can be contacted on +61 3 8587 9111 for any questions in relation to its products.

The following instructions and cautions should be observed at all times during the preparation and completion of tasks associated with the maintenance or installation of Kinder products.

It is imperative that personnel familiarize themselves with all site safety requirements prior to commencement of any work on site; and meet and adhere to all site safety requirements as a minimum standard while on site.

- 1.0 All electrical and mechanical equipment must comply with local site regulations.
- 2.0 Make sure the conveyor belt is properly tagged out (de-energised and secure), prior to initiating any work on or near the belt.
- 3.0 If appropriate ensure adequate ventilation for the type of work being carried out.
- 4.0 Ensure the safety instructions are read and understood prior to using or installing Kinder products.
- 5.0 If in doubt ask.
- 6.0 Installation instructions are available on the Kinder Australia website or by request. www.kinder.com.au
